Thank you, Chan. We interpret this as a sign of progress and appreciate your continued communication.

Just to be sure, the county's lead role does not rule out potential state and federal enforcement action, correct? We are not terribly confident in the county's enforcement record on this subject (these violations have been reported before with no action) and would appreciate continued and close state and federal involvement.

Thanks!

Hello Sir,
King County Code Enforcement is taking the lead on this investigation. I've emailed her all the information you've provided. We will coordinate with them on potential site visit along with other partner agencies.

Here's her info:

Name: Jeri Breazeal

Title: Code Enforcement Officer II

Group: [DPER - Code Enforcement](#)

Great, thank you!

We'll do whatever we can to help. Are you able to provide a brief time frame for future action and outline the most likely scenario(s)?

Thank you Sir,

I've informed King County, Ecology, Corps, and NOAA. My hope is to have a teleconference on this issue with everyone and figure out next steps. In the meanwhile, my suggestion is for you to record as much of the activities as you can (photos, etc).

Additional, you may wish to call King County's code enforcement program for immediate site visit:

<http://www.kingcounty.gov/environment/waterandland/wetlands.aspx>

Call 206-296-6680 for Code Enforcement
1-888-437-4771 for urgent, after-hours Code Enforcement complaints

Gratitude,

Chan Pongkhamsing

Hi Chan,

We have one more piece of information that may be useful. The company name "Cascade Utilities" was identified on a truck that is engaged with more filling/grading today. It appears identical to the truck (dark green dump truck) that has been observed doing similar work in the wetlands areas over the past few years. The logo on the truck also matches the logo on this company's website: <http://cascadeutilities.com/>.

There is continued activity this morning and large piles (several truck loads, at least) of gravel, rock and dirt are staged at the site with heavy machinery.

Thanks.

Hi Chan,

Please feel free to share the documents with any county or state agency. We appreciate your efforts and willingness to keep us informed.

Additionally, just so you know, too, there has been a parallel effort in the neighborhood to inform the county of our concerns with the proposed development (including concerns about the wetlands and other issues). Neighbors have been gathering signatures for a letter outlining our concerns to the county executive and our council representative. We expect it will go out within the next few days.

Would you recommend that we coordinate with Fish and Wildlife, as well, given the possible destruction of critical habitat in the area of concern (including habitat for ESA protected Chinook Salmon)?

Thank you!

Hello Concerned Residents,

I am in the process of coordinating with the Army Corps of Engineers in discussing your complaint, in the meanwhile, I would like to notify Washington State Dept of Ecology and King County about your complaints. You'll remain "anonymous", but would require me to provide them the two "presentations" that you provided titled, "Gunshy Manor Enforcement Referral" and "Gunshy Manor Exhibit". Would this be acceptable?

Gratitude,

Dear Mr. Pongkhamsing,

Please see the attached documents for requested enforcement of CWA Section 404 in King County, WA.

[REDACTED] [REDACTED] prefer to be confidential/restricted, but would assist/testify if the EPA pursues this.

Thanks!
